scan2print ChArUco target -- PRINT AT 100%, DO NOT SCALE

nominal square 24.00 mm marker 18.00 mm 7 x 5 DICT_5X5_1000
rendered square 23.9607 mm at 300 dpi (283 px) board 167.72 x 119.80 mm

CHECK BEFORE SCANNING: measure the bars above with calipers. The horizontal bar is 100.0 mm and the vertical bar is 50.0 mm, outer edge to outer edge.
If they do not match, your printer rescaled the page. Reprint with scaling set to 100% / Actual Size, or measure one chessboard square directly and
set BoardSpec.square_mm to that measured value -- the pipeline trusts square_mm absolutely and every reported dimension scales linearly with it.
(rendered lengths, before printer error: bar 99.991 mm, vbar 50.038 mm, square 23.9607 mm)
