scan2print ChArUco target -- PRINT AT 100%, DO NOT SCALE

nominal square 30.00 mm marker 22.00 mm 7 x 5 DICT_5X5_1000
rendered square 30.0143 mm at 600 dpi (709 px) board 210.10 x 150.07 mm

CHECK BEFORE SCANNING: measure the bars above with calipers. The horizontal bar is 100.0 mm and the vertical bar is 50.0 mm, outer edge to outer edge.
If they do not match, your printer rescaled the page. Reprint with scaling set to 100% / Actual Size, or measure one chessboard square directly and
set BoardSpec.square_mm to that measured value -- the pipeline trusts square_mm absolutely and every reported dimension scales linearly with it.
(rendered lengths, before printer error: bar 99.991 mm, vbar 49.996 mm, square 30.0143 mm)
